प्रश्नपुस्तिका सीरीज
Question Booklet Series

C

BBA (First Semester) Examination, February/March-2022
F010102T (A+B)

Business Statistics + Principles of Management

Time : 3:00 Hours

Maximum Marks-200

जब तक कहा न जाय, इस प्रश्नपुस्तिका को न खोलें

- निर्देश : —
1. परीक्षार्थी अपने अनुक्रमांक, विषय एवं प्रश्नपुस्तिका की सिरीज का विवरण यथास्थान सही- सही भरें, अन्यथा मूल्यांकन में किसी भी प्रकार की विसंगति की दशा में उसकी जिम्मेदारी स्वयं परीक्षार्थी की होगी।
 2. इस प्रश्नपुस्तिका में 200 प्रश्न हैं, जो दो खण्डों में विभाजित हैं। प्रथम खण्ड में 100 एवं द्वितीय खण्ड में 100 प्रश्न हैं। इस प्रकार परीक्षार्थियों को प्रत्येक खण्ड से 75-75 प्रश्नों के उत्तर देने हैं। इस प्रकार परीक्षार्थी को कुल 150 प्रश्नों के उत्तर देने हैं। प्रत्येक प्रश्न के चार वैकल्पिक उत्तर प्रश्न के नीचे दिये गये हैं। इन चारों में से केवल एक ही उत्तर सही है। जिस उत्तर को आप सही या सबसे उचित समझते हैं, अपने उत्तर पत्रक (O.M.R. ANSWER SHEET) में उसके अक्षर वाले वृत्त को काले या नीले बाल प्वाइंट पेन से पूरा भर दें। यदि किसी परीक्षार्थी द्वारा प्रत्येक खण्ड हेतु निर्धारित प्रश्नों से अधिक प्रश्नों के उत्तर दिये जाते हैं तो उसके द्वारा हल किये गये प्रथमतः यथा निर्दिष्ट प्रश्नोत्तरों का ही मूल्यांकन किया जायेगा।
 3. प्रत्येक प्रश्न के अंक समान हैं। आप के जितने उत्तर सही होंगे, उन्हीं के अनुसार अंक प्रदान किये जायेंगे।
 4. सभी उत्तर केवल ओ०एम०आर० उत्तर पत्रक (O.M.R. ANSWER SHEET) पर ही दिये जाने हैं। उत्तर पत्रक में निर्धारित स्थान के अलावा अन्यत्र कहीं पर दिया गया उत्तर मान्य नहीं होगा।
 5. ओ०एम०आर० उत्तर पत्रक (O.M.R. ANSWER SHEET) पर कुछ भी लिखने से पूर्व उसमें दिये गये सभी अनुदेशों को सावधानीपूर्वक पढ़ लिया जाय।
 6. परीक्षा समाप्ति के उपरान्त परीक्षार्थी कक्ष निरीक्षक को अपनी प्रश्नपुस्तिका बुकलेट एवं ओ०एम०आर० शीट पृथक-पृथक उपलब्ध कराने के बाद ही परीक्षा कक्ष से प्रस्थान करें।
 7. निगेटिव मार्किंग नहीं है।

महत्वपूर्ण : — प्रश्नपुस्तिका खोलने पर प्रथमतः जाँच कर देख लें कि प्रश्नपुस्तिका के सभी पृष्ठ भलीभाँति छपे हुए हैं। यदि प्रश्नपुस्तिका में कोई कमी हो, तो कक्षनिरीक्षक को दिखाकर उसी सिरीज की दूसरी प्रश्नपुस्तिका प्राप्त कर लें।

(First Section) प्रथम खण्ड

1. Large sample theory is applicable when:
(A) $N > 50$
(B) $N < 50$
(C) $N < 30$
(D) $N > 100$
2. When Null Hypothesis $H_0 : \mu = 50$, the alternative hypothesis will be:
(A) $H_1 : \mu \geq 50$
(B) $H_1 : \mu \leq 50$
(C) $H_1 : \mu < 50$
(D) $H_1 : \mu \neq 50$
3. The mean of a normal distribution is 50. What will be the value of Mode?
(A) 100
(B) 50
(C) 75
(D) 80
4. The standard deviation of a binomial distribution depends on:
(A) Probability of Success
(B) Probability of Failure
(C) Number of Trials
(D) All of these
5. The Probability of a sure event is:
(A) 1
(B) 0
(C) 0.5
(D) 1.5

6. Two Dice are tossed. What is the Probability that the total is 10 or 12?
- (A) $4/9$
 - (B) $5/9$
 - (C) $1/9$
 - (D) $7/9$
7. Probability ranges from:
- (A) -1 to $+1$
 - (B) 0 to 1
 - (C) 1 to ∞
 - (D) None of these
8. The limit of Karl Pearson's Correlation Coefficient is:
- (A) ± 1
 - (B) ± 2
 - (C) ± 3
 - (D) None of these
9. Skewness will be negative when:
- (A) $\text{Mean} > \text{Mode}$
 - (B) $\text{Mean} < \text{Mode}$
 - (C) $\text{Mean} = \text{Mode}$
 - (D) None of these
10. What is the formula of Karl Pearson's Coefficient of Skewness?
- (A) $(\text{Mean} - \text{Mode}) / \text{S.D.}$
 - (B) $(\text{Mean} - \text{Median}) / \text{S.D.}$
 - (C) $3(\text{Mean} - \text{Mode}) / \text{S.D.}$
 - (D) $2(\text{Mean} + \text{Median}) / \text{S.D.}$

11. Mean Deviation can be obtained from:
- (A) Mean
 - (B) Median
 - (C) Mode
 - (D) Any of these
12. The measure of Dispersion which is independent of frequencies of given distribution:
- (A) Range
 - (B) Q.D.
 - (C) M.D.
 - (D) S.D.
13. Quartile Deviation can be calculated by:
- (A) $(Q_3 - Q_1)/2$
 - (B) $(Q_3 + Q_1)/2$
 - (C) $(Q_3 - Q_1)/(Q_3 + Q_1)$
 - (D) None of the above
14. Which is the correct method to calculate Karl Pearson's Coefficient?
- (A) $\frac{\sum dx dy}{N\sigma_x\sigma_y}$
 - (B) $\frac{\text{Covariance of X and Y}}{\sqrt{\text{Variance of X}}\sqrt{\text{Variance of Y}}}$
 - (C) $\frac{\text{Covariance}}{SDX SDY}$
 - (D) All of the above
15. In Spearman's Rank Correlation what is 'd'?
- (A) Difference between scores
 - (B) Difference between ranks
 - (C) Both
 - (D) None of the above

(For Question No. 16-18)

Give a line $Y = 1.5 X - 1$

16. What is the value of dependent variable if value of independent variable is 10:
- (A) 16
 - (B) 15
 - (C) .5
 - (D) None
17. What is the value of regression coefficient?
- (A) $b_{xy} = +1$
 - (B) $b_{yx} = 1.5$
 - (C) $b_{xy} = -1.5$
 - (D) $b_{xy} = -1$
18. What type of line is the above?
- (A) X on Y
 - (B) Y on X
 - (C) Data insufficient
 - (D) None of the above
19. Which of the following is true?
- (A) $\text{Mode} = 3\text{Median} + 2\text{Mean}$
 - (B) $\text{Median} = \text{Mode} + \frac{3}{2}(\text{Mean} - \text{Median})$
 - (C) $\text{Mean} = \text{Mode} + \frac{3}{2}(\text{Median} - \text{Mode})$
 - (D) $\text{Mean} = \text{Mode} - \frac{3}{2}(\text{Median} - \text{Mode})$
20. For a symmetrical Distribution, which is correct:
- (A) $\text{Mean} > \text{Median} > \text{Mode}$
 - (B) $\text{Mode} = \text{Median} + \text{Mode}/2$
 - (C) $\text{Mean} < \text{Mode} < \text{Median}$
 - (D) $\text{Mean} = \text{Median} = \text{Mode}$

21. Which of the following cannot be found graphically?
- (A) Mean
 - (B) Median
 - (C) Mode
 - (D) All of the above
22. If the arithmetic mean of x , $x + 3$, $x + 6$, $x + 9$ and $x + 12$ is 10, then $x = ?$
- (A) 1
 - (B) 2
 - (C) 6
 - (D) 4
23. Select the order of sampling schemes from best to worst:
- (A) Simple random, Stratified, Convenience
 - (B) Simple random, Convenience, Stratified
 - (C) Stratified, Simple random, Convenience,
 - (D) Stratified, Convenience, Simple random
24. A statistic is:
- (A) A sample characteristic
 - (B) A population characteristic
 - (C) Unknown
 - (D) Normally distributed
25. Failing to reject the null hypothesis when it is false is:
- (A) Alpha
 - (B) Type I error
 - (C) Beta
 - (D) Type II error
26. Construction of a cumulative frequency table is useful in determining the:
- (A) Mean
 - (B) Median
 - (C) Mode
 - (D) All of the above

27. Which of the following can not be determined graphically?
- (A) Mean
 - (B) Median
 - (C) Mode
 - (D) None of these
28. While computing mean of grouped data, we assume that the frequencies of all the classes:
- (A) Evenly distributed over
 - (B) Centred at the classmarks of the classes
 - (C) Centred at the upper limits of the classes
 - (D) Centred at the lower limits of the classes
29. Mode is the:
- (A) Middle most frequent value
 - (B) Least frequent value
 - (C) Maximum frequent value
 - (D) None of these
30. The measure of central tendency which is given by the x-coordinate of the point of intersection of the 'more than' ogive and 'less than' ogive is:
- (A) Mean
 - (B) Median
 - (C) Mode
 - (D) None of these
31. Two series A and B with equal means have standard deviations 9 and 10 respectively, which series is more consistent?
- (A) A is more consistent
 - (B) B is more consistent
 - (C) Data insufficient
 - (D) None of them

32. The normal approximation to the binomial distribution is most useful for finding which of the following?
- (A) The probability $P(X = k)$ when X is a binomial random variable with large n .
 - (B) The probability $P(X \leq k)$ when X is a binomial random variable with large n .
 - (C) The probability $P(X = k)$ when X is a normal random variable with small n .
 - (D) The probability $P(X \leq k)$ when X is a normal random variable with small n .
33. Which of the following statements best describes the relationship between a parameter and a statistic?
- (A) A parameter has a sampling distribution with the statistic as its mean
 - (B) A parameter has a sampling distribution that can be used to determine what values the statistic is likely to have in repeated samples
 - (C) A parameter is used to estimate a statistic
 - (D) A statistic is used to estimate a parameter
34. Which statement is not true about the 95% confidence level?
- (A) Confidence intervals computed by using the same procedure will include the true population value for 95% of all possible random samples taken from the population
 - (B) The procedure that is used to determine the confidence interval will provide an interval that includes the population parameter with probability of 0.95.
 - (C) The probability that the true value of the population parameter falls between the bounds of an already computed confidence interval is roughly 95%
 - (D) If we consider all possible randomly selected samples of the same size from a population, the 95% is the percentage of those samples for which the confidence interval includes the population parameter

35. A sampling distribution is the probability distribution for which one of the following:
- (A) A sample
 - (B) A sample statistic
 - (C) A population
 - (D) A population parameter
36. A numerical description of the outcome of an experiment is called a:
- (A) Descriptive statistic
 - (B) Probability function
 - (C) Variance
 - (D) Random variable
37. An important application of the chi-square distribution is:
- (A) Making inferences about a single population variance
 - (B) Testing for goodness of fit
 - (C) Testing for the independence of two variables
 - (D) All of these alternatives are correct
38. The level of significance is the:
- (A) Maximum allowable probability of Type II error
 - (B) Maximum allowable probability of Type I error
 - (C) Same as the confidence coefficient
 - (D) Same as the p-value

39. If a hypothesis is rejected at the 5% level of significance, it:
- (A) Will always be rejected at the 1% level
 - (B) Will always be accepted at the 1% level
 - (C) Will never be tested at the 1% level
 - (D) May be rejected or not rejected at the 1% level
40. Which of the following is not a property of a binomial experiment?
- (A) The experiment consists of a sequence of n identical trials
 - (B) Each outcome can be referred to as a success or a failure
 - (C) The probabilities of the two outcomes can change from one trial to the next
 - (D) The trials are independent
41. In a Binomial Distribution, if p , q and n are probability of success, failure and number of trials respectively then variable is given by _____.
- (A) np
 - (B) npq
 - (C) np^2q
 - (D) npq^2
42. The probability that A speaks truth is $\frac{4}{5}$ while this probability for B is $\frac{3}{4}$. The probability that they contradict each others when asked to speak a fact is:
- (A) $\frac{7}{20}$
 - (B) $\frac{1}{5}$
 - (C) $\frac{3}{20}$
 - (D) $\frac{4}{5}$

43. If one card is drawn out of 52 playing cards, the probability that it is an ace is:
- (A) $1/26$
 - (B) $1/13$
 - (C) $1/52$
 - (D) $1/4$
44. If A and B are two events such that $P(A) \neq 0$ and $P(B/A) = 1$ then:
- (A) $P(A/B) = 1$
 - (B) $P(B/A) = 1$
 - (C) $P(A/B) = 0$
 - (D) $P(B/A) = 0$
45. A pair of dice are rolled. The probability of obtaining an even prime number on each dice is:
- (A) $1/36$
 - (B) $1/12$
 - (C) $1/6$
 - (D) 0
46. If A and B are two independent events, then:
- (A) $P(A \cap B) = P(A) \times P(B)$
 - (B) $P(AB) = 1 - P(A') P(B')$
 - (C) $P(AB) = 1 + P(A') P(B') P(A')$
 - (D) $P(AB) = P(A')P(B')$

47. The correlation coefficient is used to determine:
- (A) A specific value of the y-variable given a specific value of the x-variable
 - (B) A specific value of the x-variable given a specific value of the y-variable
 - (C) A causal relationship between the x and y variables
 - (D) None of these
48. The regression coefficient are independent of change of origin but:
- (A) Not of Scale
 - (B) Also of Scale
 - (C) No change in scale
 - (D) None
49. If one of the regression coefficient is greater than unity, the other must be:
- (A) More than Unity
 - (B) Less than Unity
 - (C) Unity
 - (D) None
50. The regression coefficient of X on Y is:
- (A) b_{XY}
 - (B) b_{YX}
 - (C) Not specified
 - (D) None

51. If the sum of squares of the rank differences of 10 pairs of values is 30, find the correlation coefficient between them.
- (A) 0.75
 - (B) 0.82
 - (C) 0.90
 - (D) 0.83
52. The method used to compute average or central value of the collected data is considered as:
- (A) Measures of positive variation
 - (B) Measures of central tendency
 - (C) Measures of negative skewness
 - (D) Measures of negative variation
53. The variate values which divide a series into ten equal parts are called:
- (A) Quartiles
 - (B) Deciles
 - (C) Percentiles
 - (D) None of these
54. If the mean is 11 and the median is 13 then the value of mode is:
- (A) 15
 - (B) 13
 - (C) 11
 - (D) 17

55. What are the method of collecting Primary data:
- (A) Interview
 - (B) Observation
 - (C) Questionnaire
 - (D) All of the above
56. If two variables, x and y, have a very strong linear relationship, then:
- (A) There is evidence that x causes a change in y
 - (B) There is evidence that y causes a change in x
 - (C) There might not be any causal relationship between x and y
 - (D) None of these alternatives is correct
57. The coefficient of correlation:
- (A) Is always greater than one
 - (B) Can be positive as well as negative
 - (C) Is always positive
 - (D) Can never be negative
58. The correlation coefficient is used to determine:
- (A) A specific value of the y-variable given a specific value of the x- variable
 - (B) A specific value of the x-variable given a specific value of the y-variable
 - (C) The strength of the relationship between the x and y variable
 - (D) None of these

59. The positive square- root of the arithmetic mean of the Square of the deviations of the given observation from their arithmetic mean is called:
- (A) Standard deviation
 - (B) Mean deviation
 - (C) Quartile deviation
 - (D) Variance
60. The algebraic sum of deviation of a set of n values from A. M. is:
- (A) n
 - (B) 0
 - (C) 1
 - (D) $2n$
61. Which average is affected most by the presence of extreme items?
- (A) Median
 - (B) Mode
 - (C) Arithmetic mean
 - (D) None
62. The mean of 11 numbers is 7. One of the numbers, 13, is deleted. What is the mean of the remaining 10 numbers?
- (A) 7.7
 - (B) 6.4
 - (C) 6.0
 - (D) 5.8

63. The mean of ten number is 58. If one of the numbers is 40, what is the mean of the other nine?
- (A) 18
 - (B) 60
 - (C) 162
 - (D) 540
64. If the correlation coefficient is a positive value, then the slope of the regression line:
- (A) Must also be positive
 - (B) Can be either negative or positive
 - (C) Can be zero
 - (D) Can not be zero
65. In regression analysis, if the independent variable is measured in kilograms, the dependent variable :
- (A) Must also be in kilograms
 - (B) Must be in some unit of weight
 - (C) Cannot be in kilograms
 - (D) Can be any units
66. In regression analysis, the variable that is used to explain the change in the outcome of an experiment, or some natural process, is called:
- (A) The x- variable
 - (B) The independent variable
 - (C) The criterion variable
 - (D) The explanatory variable

67. The coefficient of correlation:
- (A) Is the square of the coefficient of determination
 - (B) Is the square root of the coefficient of determination
 - (C) Is the same as r- square
 - (D) Can never be negative
68. If there is a very strong correlation between two variables then the correlation coefficient must be:
- (A) Any value larger than 1
 - (B) Much smaller than 0, if the correlation is negative
 - (C) Much larger than 0, regardless of whether the correlation is negative or positive
 - (D) None of these alternatives is correct
69. In hypothesis testing, the hypothesis tentatively assumed to be true is:
- (A) The alternative hypothesis
 - (B) The null hypothesis
 - (C) Either the null or the alternative
 - (D) None of these alternatives is correct
70. Convenience sampling is an example of:
- (A) Probabilistic sampling
 - (B) Stratified sampling
 - (C) Nonprobabilistic sampling
 - (D) Cluster sampling
71. Two events, A and B, are mutually exclusive and each have a nonzero probability. If event A is known to occur, the probability of the occurrence of event B is:
- (A) One
 - (B) Any positive value
 - (C) Zero
 - (D) None of the above

72. If two events are independent, then:

- (A) They must be mutually exclusive
- (B) The sum of their probabilities must be equal to one
- (C) Their interaction must be zero
- (D) None of these alternatives is correct

73. Compute the mode for the following frequency distribution:

Size of items:	0-4	4-8	8-12	12-16	16-20	20-24	24-28	28-32	32-36	36-40
Frequency:	5	7	9	17	12	10	6	3	1	0

- (A) 32.66
- (B) 28.43
- (C) 24.87
- (D) None

74. The median of the data: 19, 25, 59, 48, 35, 31, 30, 32, 51. If 25 is replaced by 52, what will be the new median?

- (A) 35
- (B) 32
- (C) 30
- (D) 31

75. Calculate A. M.:

Size	2	3	4	5	6
Frequency	5	8	10	10	7

- (A) 4.15
- (B) 5.15
- (C) 3.45
- (D) None

76. The standard deviation for 15, 22, 27, 11, 9, 21, 14, 9 is:
- (A) 6.22
 - (B) 6.12
 - (C) 6.04
 - (D) 6.32
77. The mode of a frequency distribution can be determined graphically by:
- (A) Histogram
 - (B) Frequency curve
 - (C) Frequency polygon
 - (D) Ogive
78. The median of a frequency distribution is found graphically with the help of:
- (A) Histogram
 - (B) Frequency curve
 - (C) Frequency polygon
 - (D) Ogive
79. The most commonly used device of presenting business and economic data is:
- (A) Pie diagrams
 - (B) Pictograms
 - (C) Bar diagrams
 - (D) Line diagrams
80. Type of bar diagram is:
- (A) Pictogram
 - (B) Sub divided diagram
 - (C) Line diagram
 - (D) Pie diagram

81. A systematic arrangement of data in rows and columns is:
- (A) Table
 - (B) Tabulation
 - (C) Body
 - (D) All of above
82. The first step in tabulation is:
- (A) Foot note
 - (B) Source note
 - (C) Captions
 - (D) Classification
83. If the mid points of the classes are 16, 24, 32, 40 and so on, then the magnitude of the class interval is:
- (A) 8
 - (B) 9
 - (C) 7
 - (D) 6
84. The classes in which the lower limit or the upper limit is not specified are known as:
- (A) Open end classes
 - (B) Close end classes
 - (C) Inclusive classes
 - (D) Exclusive classes

85. The value lying half way between the upper limit and lower limit of the class is:
- (A) Frequency
 - (B) Mid-point
 - (C) Class interval
 - (D) None of the above
86. The magnitude of the class is the:
- (A) The product lower limit and upper limit
 - (B) The sum of lower limit and upper limit
 - (C) The difference of upper limit and lower limit
 - (D) None of these
87. _____ means separating items according to similar characteristics and grouping them into various classes.
- (A) Tabulation
 - (B) Editing
 - (C) Separation
 - (D) Classification
88. The basic objective of a sample is to draw _____ about the population from which such sample is drawn.
- (A) Conclusion
 - (B) Inferences
 - (C) Characteristics
 - (D) Parameters

89. A _____ sample is formed by selecting one unit at random and then selecting additional units at evenly spaced intervals until the sample has been formed.
- (A) Stratified
 - (B) Systematic
 - (C) Judgement
 - (D) Random
90. A variable is any characteristic which can assume _____ values.
- (A) Different
 - (B) Similar
 - (C) fixed
 - (D) Assumed
91. The method of sampling, in which the choice of sample items depends exclusively on the judgement of the investigator is termed as _____.
- (A) Convenience sampling
 - (B) Quota sampling
 - (C) Systematic sampling
 - (D) Judgement sampling
92. A sample is a portion of the _____ population that is considered for study and analysis.
- (A) Selected
 - (B) Total
 - (C) Fixed
 - (D) Random

93. The _____ process would be required to ensure that the data is complete and as required.
- (A) Editing
 - (B) Tabulation
 - (C) Analysis
 - (D) Ordering
94. Data is simply the numerical results of any scientific _____.
- (A) Analysis
 - (B) Researches
 - (C) Observation
 - (D) Measurement
95. Numerical facts are usually subjected to statistical analysis with a view to helping a decision maker make wise decisions in the face of _____.
- (A) Surety
 - (B) Uncertainty
 - (C) Probability
 - (D) Randomness
96. Sampling is simply a process of learning about the _____ on the basis of a sample drawn from it.
- (A) Census
 - (B) Population
 - (C) Group
 - (D) Area

97. Non-sampling errors are introduced due to technically faulty observations or during the _____ of data.
- (A) Collection
 - (B) Analysis
 - (C) Sequencing
 - (D) Processing
98. Which of the following is not an example of the functions of statistics?
- (A) Intelligence quotient (IQ)
 - (B) Average
 - (C) Diagram
 - (D) χ^2 test
99. “Statistics are effected to a marked extend by”
- (A) Numerically stated
 - (B) Multiplicity of causes
 - (C) Aggregate of facts
 - (D) Complex manifestations
100. ‘Arthashastra’ Provides statistical facts about in the country.
- (A) Population Statistics
 - (B) State Administration
 - (C) Fact of day- to day life
 - (D) All of the above

(Second Section) द्वितीय खण्ड

101. Which one of the following does measure risk?
- (A) Coefficient of variation
 - (B) Standard deviation
 - (C) Expected value
 - (D) All of the above are measures of risk
102. _____ deals with appointing people and placing them at the appropriate jobs.
- (A) Human resources
 - (B) Recruitment
 - (C) Staffing
 - (D) Placement
103. The extent to which power and authority are retained at the top is called as_____.
- (A) Centralization
 - (B) Decentralization
 - (C) Responsibility
 - (D) Accountability
104. Elements of delegation_____.
- (A) Responsibility, Authority, Accountability
 - (B) Authority, Delegation, Accountability
 - (C) Responsibility, Decentralization, Centralization
 - (D) Controlling, Responsibility, Authority

105. The right of a person to give instructions to his subordinates is known as _____.
- (A) Responsibility
 - (B) Authority
 - (C) Accountability
 - (D) Line authority
106. A decision which is taken to meet unexpected situation _____.
- (A) Problem decision
 - (B) Certainty decisions
 - (C) Crisis decision
 - (D) Organizational decision
107. Selecting a best course of action among the alternatives is called as _____.
- (A) Decision making
 - (B) Planning
 - (C) Organizing
 - (D) Controlling
108. The study relating to the movement of a machine operator and his machine while performing the job is called _____.
- (A) Time study
 - (B) Work study
 - (C) Motion study
 - (D) Fatigue study
109. The transmission of thoughts from person to another is _____.
- (A) Communication
 - (B) Controlling
 - (C) Consultative
 - (D) Organizing

110. Decision making helps in the smooth function of the _____.
(A) Business

Rough Work / रफ कार्य

DO NOT OPEN THE QUESTION BOOKLET UNTIL ASKED TO DO SO

1. Examinee should enter his / her roll number, subject and Question Booklet Series correctly in the O.M.R. sheet, the examinee will be responsible for the error he / she has made.
 2. **This Question Booklet contains 200 questions, which is divided into 2 sections. Kindly attempt any 75 questions from section 1st and any 75 questions from section 2nd. In this way examinee has to attempt only 150 questions in total. Every question has 4 options and only one of them is correct. The answer which seems correct to you, darken that option number in your Answer Booklet (O.M.R ANSWER SHEET) completely with black or blue ball point pen. If any examinee will mark more than one answer of a particular question, then the first most option will be considered valid.**
 3. Every question has same marks. Every question you attempt correctly, marks will be given according to that.
 4. Every answer should be marked only on Answer Booklet (O.M.R ANSWER SHEET). Answer marked anywhere else other than the determined place will not be considered valid.
 5. Please read all the instructions carefully before attempting anything on Answer Booklet(O.M.R ANSWER SHEET).
 6. After completion of examination please hand over the Answer Booklet (O.M.R ANSWER SHEET) to the Examiner before leaving the examination room.
 7. There is no negative marking.
- Note:** On opening the question booklet, first check that all the pages of the question booklet are printed properly in case there is an issue please ask the examiner to change the booklet of same series and get another one.
