The Council of Student Hobby Clubs in the University

PREAMBLE:

With an objective of helping students to pursue their hobbies and interests and to bring people together, the student clubs are created at the university.

As a club member one knows about oneself, one's interests and goals. Students can reveal their strengths like multitasking, organization skills, team building skills and leadership skills. They can add skills to their repertoire. The clubs also help in pursuing an old hobby. Networking opportunities being a major benefit, club members develop bonds among themselves which help in growing their careers. Association of students with clubs help in showcasing one's domain interest, balance between work and hobbies. Activities organized/participated as a club member looks good on the resume. Intellectual innovation, social engagement, and universal sustainability demand the students to groom their diverse values, communication skills and hidden talents. These diverse values would complement the academic and co-curricular streams of the university. Hence, club activities play a pivotal role in transforming students' passion and hobbies into socially desirable skills for the present global demands. With more self-efficacy, students would get an opportunity to enhance their performance and skills in diverse social scenarios.

Bhagavad-Gita says, "A person is said to have achieved yoga, the union with the Self, when the perfectly disciplined mind gets freedom from all desires, and becomes absorbed in the Self alone."

Joining a gym is not just a body-changing experience. The whole process can bring about significant changes in your lifestyle. Most people have a certain image in mind before joining a gym. You get flexibility in your body, you are not only improving your body from the outside but also from the inside and a glow to your skin.

Come to join our very own gym in CSJMU's Campus.

ABOUT THE CLUB

A cooking club is a group of people who gather together on a regular or semi-regular basis to take on a large cooking project or explore an unfamiliar cuisine. As mentioned, the benefits are usually to share labor and ingredients.

Food is central to culture, identity, health, and life. Learning how to cook healthy and enjoyable meals is an important and valuable skill.

Food brings people together and this club would do so in a way that integrates learning as well. The goals of this club are not only to cook these meals as a community but also to teach culinary skills, bring awareness, and dedicate our time to food justice and sustainability; advocating for the right to healthy, nutritious, fresh food.

OBJECTIVES

.The cooking club focuses on creating awareness about cooking healthy foods among the students.

.The students from various states learn the art of cooking simple food items of different states.

.Our mission is to bring together students who share a common love for food and those who have a passion towards cooking.

The club also aims to nurture the healthy cooking habits which help Thomasines to lead a strong and healthy life.

INDIAN CUISINE

The Indian cuisine boasts of an immense variety not restricted to only curry. An authentic Indian curry is an intricate combination of a stir-fried Masala – a mixture of onion, garlic, ginger, and tomatoes; various spices and seasonings with which meat; poultry, vegetables or fish is prepared to produce a stew-type dish. [Note: the word Masala also means spice.]

Food in India is wide ranging in variety, taste and flavor. Being so diverse geographically, each region has its own cuisine and style of preparation. Indian cuisine, renowned for its exotic gravies seems complicated for any newcomer. The Mughlai cuisine of North differs sharply from the preparations of the south. The Wazwan style of Kashmir is luxurious but the same can be said about Bengal's Macher Jhol, Rajasthan's Dal Bati, Uttar Pradesh's Kebabs and Punjab's Sarson Ka Saag and Makki di Roti. In India, recipes are handed down from generation to generation.

unique and strong flavours in Indian cuisine are derived from spices, seasonings and nutritious ingredients such as leafy vegetables, grains, fruits, and legumes. Most of the spices used in Indian cooking were originally chosen thousands of years ago for their medicinal qualities and not for flavor. Many of them such as turmeric, cloves and cardamoms are very antiseptic, others like ginger, are carminative and good for the digestion. All curries are made using a wide variety of spices.

Indian cuisine, food is categorized into six tastes – sweet, sour, salty, spicy, bitter and astringent. A well-balanced Indian meal contains all six tastes, not always can this be accomplished. This principle explains the use of numerous spice combinations and depth of flavor in Indian recipes. Side dishes and condiments like chutneys, curries, daals and Indian pickles contribute to and add to the overall flavor and texture of a meal and provide balance needed
